

FIBER BALERS

Fiber balers, also known as palm fiber balers and coir fiber balers. They are widely used to compress all types of fibers such as palm fiber, coir fiber, alfalfa, flax, straw, and yarn waste, etc. Compressing and recycling fibers require a lot of power and energy. Therefore, the powerful hydraulic pack ensures delivery of enough power for pressing the nature fiber.

SPECIFICATIONS

Model	1500F11040	2000F12080
Hydraulic Power	150tons	200tons
Motor Power	18.5kw	22kw
Feeding Size (L*H)	1100*500mm	1200*500mm
Baling Chamber Height	1700mm	1700mm
Bale Size (L*W*H, H is adjustable)	1100*400*(400-1200) mm	1200*800*(400-1200) mm
Bale Weight	80-240kgs	100-300kgs
Machine Weight	4000kgs	6000kgs
Machine Overall Dimension	3400*900*3500mm	3500*1350*3700mm

FEATURES

- ▶ The front and back opening doors design ensure the convenience of bales strapping.
- ▶ Special two rams design ensure the platen not slope because of uneven materials feedings during compression
- ▶ An automatic chain bale ejector is equipped for efficiently and effectively ejecting the bales out from the baler chamber
- ▶ The ram will stop running downwards when the feeding gate is opened which ensures the safety of the operation
- ▶ Equipped with independent emergency stop for safe operation
